

# Treating children in Rwanda

---

Dr G.Laurent  
March 2005  
Maputo

# Step 1: Guidelines

---

ART guidelines

Nutrition guidelines

Reference guidelines

## Step 2:

# Access points to treatment and care

---

Training for PMTCT-VCT nurses

When, how, where to refer.

Nutrition centers, hospital wards

## Step 3: Theoretical training

---

Objectives for each type of professionals  
Material for a 2 day training  
Counseling material

# Step 4 : Practical training

---

Finding pediatric HIV sites

# Step 5: Initiation and supervision

---

Role of the GP

Lack of paediatric HIV specialists

Creating a reference centre

# Reference centre

---

Assessment of basic needs

Need for supervision

Don't forget counselors

## Work plan:

---

Choosing sites geographically

Choosing sites with significant PMTCT activity?

Train the GPs currently working at TRAC?

What about lab tests? PCR?

---
